

List of Takagi Lecturers

2006 Autumn

S. Bloch (University of Chicago)

Graphs and motives

P.-L. Lions (Collège de France)

Mean field games

S. Smale (Toyota Technological Institute at Chicago, University of Chicago)

A mathematical setting for emergence

C. Voisin (Institut de mathématiques de Jussieu)

Some aspects of the Hodge conjecture

2007 Spring, Autumn

K.-H. Neeb (Technische Universität Darmstadt)

Towards a Lie theory of locally convex groups

D.-V. Voiculescu (University of California)

Aspects of free analysis

M. Yor (Universités Paris VI et VII)

On penalizations of Wiener measure

P. Malliavin (Université Paris VI)

Invariant or quasi invariant probability measures for infinite dimensional groups

J. Makino (National Astronomical Observatory of Japan)

Do-it-yourself Computational Astronomy

— Hardwares, Algorithms, Softwares, and Sciences

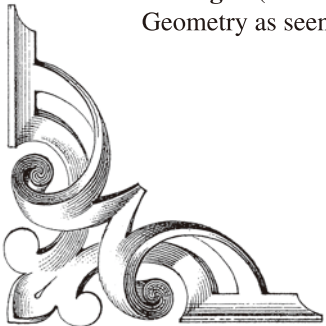

2008 Spring

O. Viro (Steklov Institute at St. Petersburg, Stony Brook University)

From the sixteenth Hilbert problem to Tropical Geometry

H. Ooguri (California Institute of Technology, IPMU)

Geometry as seen by string theory

The Mathematical Society of Japan
